How Do I Obtain A Security Light?

Security lighting is optional to the member. If you are in need of security lighting please come in or call a member service representative and request a security light to be added to their property. The MSR will create a service order to install a security light. This might take up to three (3) weeks to install due to work commitments.

The cost of the security light depends on the wattage that you will require. When the wattage is confirmed the MSR will quote you the monthly price of the security light. The charge will be added to your monthly electric bill.
